**To: Mr.A.V.Vostrikov**

**Deputy General Director of Rusatom Service JSC for Operation Support –  
ATEX JSC Managing Director**

**Sub: Technical decision of MSIV**

Dear Sir,

In response to the letter No. 340-01-20/1392 dated 18.10.2018 with TCP subject of reviewing and approving the technical decision of MSIV valve modernizations, hereby we kindly inform you that during the repair in 2017, some defects were determined on MSIV valves which the manufacturer has also been informed about it. These defects occurred during the outage of the plant which the factory representative related it to the MSIV lateral valves. Although all the suggestions of the factory representative during PPM 2017 were performed, the mentioned defects were repeated.

In 2017, the plant invited the representative of the manufacturer to give additional recommendation. Based on the recommendation given by the representative of the manufacturer, the modernization was done. In order to perform modernization the Principal purchased all the springs and main parts, according to the requirement of manufacturer from Russian market.

In order to review and approve the technical decision of MSIV modernization, the price proposed by the Contractor is not acceptable for the Principal. Thus we kindly ask you to review the TCP and send the results again.

**Sincerely yours**

**H.Ghaffari**

**Bushehr NPP Manager and Managing Director**
