**To: Mr.E.A Salkov**

**Director General of Rusatomservice**

**Sub: Determination of the Time for Performing BNPP-1 Turbo Generator Overhaul**

Dear Sir,

As you already know, the turbogenerator overhaul is conducted every seven years according to the manufacturer documents. Its previous overhaul was performed in 2015 and the next overhaul will be carried out in 2022. According to the schedule, the BNPP-1 will have mid-life maintenance and repairs (PPM) in 2022 also, (Bushehr NPP overhaul will be in 2020).

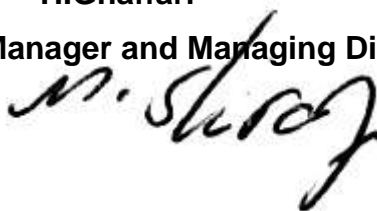

Therefore, you are kindly requested to provide turbogenerator overhaul program in a way that it can be performed in max 45 days. If this is not possible, please make an inquiry from the manufacturer in regard to deferring the Turbogenerator overhaul to next power plant overhaul (2024) and inform the BNPP-1 of the results.

**Sincerely yours**

**H.Ghaffari**

**Bushehr NPP Manager and Managing Director**
