Subject: Steam Generator Shutoff Devices

Dear Mr. Ghaffari,

Please find attached to this letter information about steam generator shutoff devices as a follow-up to the 01.08.2018 video conference. The design of the said devices allows for their use in steam generators of Unit No. 1 of the Bushehr NPP. Please note that it is necessary to ensure availability of sets of shutoff devices for at least 2 (two) steam generators at the Bushehr NPP site; this is necessary to meet the Unit repair deadlines when inspecting the metal of the 3 (three) steam generators during the upcoming PPM.

Based on the preliminary agreements under Attachment No. 1.4 to Contract No. SP-BNPP-1-2018/309/1575-D dd September 2017, we are kindly asking you to send us an application for supply of the said equipment.

Attachment: Information About Shutoff Devices (one 4-page document).

Aleksei Emelianov
Deputy Director General –
Technical Director
