Work Performance by the Personnel
under Appendix No. 7 to Contract PPM/T-4100

Dear Mr. Ghaffari,

It is necessary to work out a schedule for either workload or departure of the personnel performing work under Appendix No. 7 to the Contract PPM/T-4100 as of September 2017, since the work to be done during PPM-2018 is nearly complete. Such schedule needs to be worked out in a timely manner.

I am asking you to consider and agree our Proposal for Personnel Involvement in Work Performance at the *Bushehr* NPP during the 2018 Interrepair Period. The proposal is attached to this letter.

If we deal with this matter in a timely manner, it will allow us to make sure that the work is performed by the specialists who had proved themselves during work performance at the *Bushehr* NPP Site and who have very valuable experience.

Our suggestion is to extend the Stage 1 of the Contract and then use the Stage 3 expected labor input in order to make the most of unused labor input. The purpose of this suggestion is to make sure the work is performed by the said specialists.

Attachment: Proposal for the *Rusatom Service* JSC Personnel Involvement in Work Performance at the *Bushehr* NPP during the 2018 Interrepair Period under Appendix No. 7 to the Contract (one 1-page document).

Deputy Director General –
Technical Director

Alexei Emelianov

Sergei Sharabanov
