**To: Mr.A.V.Vostrikov**

**Deputy General Director of Rusatom Service JSC for Operation Support –  
ATEX JSC Managing Director**

**Sub: Implementation of Crisis Monitor and Crisis 6 Software at BNPP**

Dear Sir,

Referring to meeting on October, 2017 and in response to the letter Nos. 340-01-20/159, dated 02.02.2018 of the contractor regarding Crisis Monitor and Crisis 6 software the following questions need to be clarified by the contractor:

- Whether the process of verification & validation has been performed by the Russian Regulatory or not? If the process has been performed, its documentation should be presented to the principal.
- Is it possible to couple Crisis Monitor and Risk Spectrum?
- Could you kindly provide us with the price of Crisis Monitor and Crisis 6 software and their support conditions?
- What is the average difference between calculating results of Crisis 6 and Risk Spectrum for an actual plant?
- The necessity of using “источник” section to install and work of Crisis 6 and Crisis Monitor is unclear and needs to be specified.

Your cooperation to answer the above questions is appreciated.

Furthermore, it's required that the capabilities and performance of the software be demonstrated to principal by the contractor's experts at the BNPP site.

**Sincerely yours**

**H.Ghaffari**

**Bushehr NPP Manager and Managing Director**
