Director General of Rusatomservice

Sub: Overhaul the deasel-genarator of safety trains of BNPP in the 2019-PPM

Dear Sir,

Since Bushehr Nuclear Power Plant (BNPP) has decided that a diesel generator of safety trains of BNPP be majorly overhauled (TO3) in the 2019-PPM by the manufacturer, and also considering the fact that the manufacturer representative has made visit to the BNPP site and safety trains, it is necessary that the manufacturer provides response to the following matters:

- 1- The exact schedule and list of the details of execution of diesels generator overhaul in the specified time period (two weeks).
- 2- Necessary workshop facilities for performing this overhaul such as:
 - Workshop environment necessary for overhaul;
 - Necessary hoisting equipment;
 - Complete list of necessary special tools.
- 3- The number of necessary personnel for overhaul of generator in the determined period and also necessary expertise, documentations and experience of these personnel.
- 4- Announcing the workshop environment conditions for this overhaul such as temperature, necessary light, permissible humidity rate of the environment for this overhaul, etc.
- 5- List of the spare parts necessary for the overhaul of diesel generator.
- 6- Other issues at the discretion of the Contractor.

Sincerely yours

H.Ghaffari

Bushehr NPP Manager and Managing Director
